DESCRIPTORS	Agribusiness; Agricultural Machinery Occupations; *Agricultural Occupations; Agricultural Production; Employment Opportunities; Employment Qualifications; Forestry Occupations; Job Market; Landscaping; *Occupational Information; Occupational Surveys; *Off Farm Agricultural Occupations; Relevance (Education); Secondary Education; Skill Analysis; *Task Analysis; *Technical Occupations; Vocational Agriculture
IDENTIFIERS	Elementary Secondary Education Act Title III; ESEA Title III; Florida; *Pretechnical Education

ABSTRACT

The document is one of five summary reports, all part of a Pre-Technical Curriculum Planning Project for secondary students who aspire to technical employment or post secondary technical education. This report represents the results of an assessment of the northeast Florida area's technical occupations in agriculture and related businesses. A three phase approach was utilized: (1) the identification of four broad career clusters in agribusiness: landscaping, animal/food production, forestry and natural resources, and agricultural mechanics; (2) development of a survey instrument; and (3) a review of data collected. The following occupations are some of those analyzed according to tasks and corresponding skills/knowledges: florist shop technology, floral design, greenhouse technology, landscape technology, dairy and poultry plant managing, poultry service, logging, forestry research technology, game and fish management, aquatic weed control, wild life officer, ranger, agricultural mechanics, service and sales, and truck driving. Employment statistics and projections, conclusions and recommendations complete the document. (MW)

ACKNOWLEDGMENTS

The project staff wish to express their appreciation to the following individuals for their contributions.

CHAIRMAN, SPECIAL ADVISORY COMMITTEE

Dr. Gene C. Nutter, Turf-Grass Publications, P. O. Box 51088, Jacksonville Beach, Florida.

SPECIAL CONSULTANTS

Vernon Gifford, Vocational Agriculture Instructor, Paxon Senior High School, Jacksonville, Florida.

Frank Benton, Vocational Agriculture Instructor, Paxon Senior High School, Jacksonville, Florida.

ADVISORY COMMITTEES

I. Landscaping Technology

Dr. Gene Nutter, Editor-Publisher, Turf-Grass Publications, Inc., P. O. Box 51088, Jacksonville Beach, Florida.

Joseph Welker, Landscape Architect, Duval Landscaping Company, Jacksonville, Florida.

Carl Loop, Loop's Nursery and Greenhouse, Inc., Jacksonville, Florida.

Vernon Gifford, Vocational Agriculture Instructor, Paxon Senior High School, Jacksonville, Florida.

II. Food Products and Servicing

Don Perrett, Dairyman, Perrett's Dairy, Jacksonville, Florida.

Frank Bennett, Vocational Agriculture Instructor, Paxon Senior High School, Jacksonville, Florida.

Frances Raysinger, Home Economics Supervisor, Southside Administrative Center, Duval County School Board, Jacksonville, Florida.

III. Forestry and Natural Resources

John Tansberry, Urban Forester, Florida Forestry Service, Jacksonville, Florida.

G. Robinson Barker, Silviculturist, Forestry and Timberlands Division, St. Regis Paper Company, Jacksonville, Florida.

Lt. Marilyn Mullis, Interpretive Naturalist, Florida State Parks, P. O. Box 150, Fort White, Florida.

Lt. Laurence Rossignol, Educational Officer, Game & Fresh Water Fish Management, Lake City, Florida.

IV. Mechanics in Agriculture

Rick Altobellis, Jacksonville Ford Tractor, Jacksonville, Florida.

Bill Schmidt, Florida Tractor Corporation, Jacksonville, Florida.

Buddy Tresca, Tresca Turf Equipment Company, Jacksonville, Florida.

Lowell Culp, Culp Lawn Equipment Company, Jacksonville, Florida.

COOPERATING

James N. Watson, Director County Extension Division, Jacksonville, Florida.

R. E. Jones, Vocational Agriculture Instructor, Baldwin Junior-Senior High School, Baldwin, Florida.

Dr. Douglas Patterson, Director, Project Agriculture, Gainesville, Florida.

J. Glenn Morrill, Project Agriculture, Gainesville, Florida.

Peter Douaihy, Project Agriculture, Gainesville, Florida.

Herbert B. Attaway, Jr., Dean Technical Division, Lake City Community College, Lake City, Florida.

INTRODUCTION

In 1971, the Duval County School Board took a major step forward in providing relevant curriculum for students when they adopted the concept of a three-program curriculum for senior high schools. The three programs decided upon by the Board were:

1. Vocational
2. College Preparatory
3. Pre-Technical

The differences between this high school curriculum and most others were that:

> The pre-technical program filled the gap between the vocational and the professional level preparation.
>
> Each of the three programs was directly related to the student's post high school plans.

The traditional programs and curriculum had made available programs that would provide the skills and knowledges for pupils desiring to enter a vocation or college, but only a few technical, and no pre-technical courses were offered.

This lack of a pre-technical curriculum was not a problem unique to Duval County Schools. Investigations by staff members of the Duval County School Board of existing programs at the local and state level, followed by consultations with state and national experts in technological education, revealed that no planned program of pre-technical education at the secondary level existed in

BEST COPY AVAILABLE

the state or in the nation. Only fragments of a pre-technical curriculum, and a few high school technical programs, could be found. The failure of education on a national scale to respond to the needs of certain students, industries, and businesses emphasized the requirement for a carefully prepared pre-technical curriculum at the secondary level.

Education's failure to meet the need for technical and pre-technical education provided the impetus for this project. The project's ultimate goal is to develop a pre-technical curriculum which provides secondary students, who aspire to technical employment or post secondary technical education, with the requisite skills, knowledges, and attributes to respond successfully to current and anticipated demands of local, state, and national job markets.

Before any curriculum could be developed, an assessment had to be made of the kinds of technical occupations that presently exist in the Northeast Florida area plus the associated skills, knowledges, and attributes needed for these occupations. This summary report presents the results of that assessment.

The study was limited to the Northeast Florida area and to selected agencies because of time and personnel constraints. However, there is no reason why the procedures used in this study would not be applicable for a wider geographic region.

BEST COPY AVAILABLE

DESIGN OF THE STUDY

This study was designed to meet the following objectives with respect to technical occupations in Agriculture and its related businesses in Northeast Florida:

1. To identify the existing technical occupations and the number of present and anticipated employees in each;
2. To determine the requisite skills, knowledges, and attributes associated with successful participation in each occupation identified in (1);
3. To cluster the technical occupations.

The scope of the study required a three-phase approach.

Phase I was the identification of four broad career clusters in the Agri/Business Area. These were determined to be:

1. Landscaping
2. Animal/Food Production
3. Forestry and Natural Resources
4. Mechanics in Agriculture

Special Area Advisory and Review Committees were established in each of the clusters. Each committee was composed of:

1. Area specialists from the Duval County School Board;
2. Working technicians;
3. Key representatives from the Agri/Businesses in Duval County.

BEST COPY AVAILABLE

The first function of each committee was to prepare a rough draft survey form of tasks performed in each cluster area. A tentative list of skills, knowledges, and attributes was also identified at this time. The project staff was responsible for researching the literature and making resources available to assist the committee members in this endeavor. After preparing the survey instrument for each area, the committee members identified businesses in the Northeast Florida area which employed personnel in technical positions, and then identified key individuals within those agencies. These key individuals were contacted by staff personnel, met as an advisory committee, and completed a job task survey instrument for the technical occupations existing within the business.

Phase II consisted of developing a written survey instrument which was mailed to businesses not contacted in Phase I. This survey was used to supplement the information obtained in Phase I and to identify the number of present and anticipated employees in each occupation. Businesses identified in Phase II were determined from the following sources:

1. Yellow pages of the telephone directory;
2. Consolidated City of Jacksonville Records;
3. Project Agriculture, a survey by the University of Florida of all agricultural enterprises.

BEST COPY AVAILABLE

An attempt was made to contact all businesses from the sources listed where one or more workers were required to have competencies in job performance for Agriculture and its related businesses.

The primary method of determining the number of present and anticipated employees was a mailed questionnaire. This method was selected for the following reasons:

1. It allowed wider coverage and a larger number of contacts than a personal interview;
2. It was less expensive than a personal interview;
3. A mailed questionnaire allowed the agency representative to complete it at his leisure.

Follow-ups (personal visit or telephone) to the questionnaire were made by a project staff member in the following cases:

1. Business that did not return the questionnaire;
2. If the returned questionnaire indicated a new technical position existed in that business.

In Phase III, members of the Special Area Advisory Committees met to review the data collected. Task forces composed of consultants and members of each area advisory committee met individually, and in some cases jointly, to expand and compile the lists of tasks and skills in each of the four areas.

BEST COPY AVAILABLE

Based on these lists, a final review and modification was made by selected committee members. The results of that review are presented in Chapters 1-5 of this report.

ANALYSIS OF RESPONSE

In the Landscaping Area (16) sixteen golf courses, (35) thirty-five nurseries, (40) forty florists, (10) ten cemeteries, (21) twenty-one lawn maintenance, and (15) fifteen tree services were contacted in either Phase I or Phase II. The table below shows the results of these surveys.

	NUMBER	PERCENTAGE
Original Mail-Out	138	80%
Number Returned	26	18%
Telephone Follow-Up	52	47%
Number Successful Responses from Telephone Follow-Up	23	44%
Personal Visits	3	
Total Response	52	38%

In the Animal/Food Production area (10) ten dairy or milk producers, and (11) eleven egg and poultry producers were contacted in either Phase I or II. The table below shows the results of these surveys.

	NUMBER	PERCENTAGE
Original Mail-Out	20	90%
Number Returned	7	35%
Telephone Follow-Up	7	50%
Number Successful Responses from Telephone	2	28%
Personal Visits	3	
Total Response	12	54%

BEST COPY AVAILABLE

ANALYSIS OF RESPONSE

In Forestry, Parks and Recreation, Game and Fresh Water Fish Management (4) four agencies and (2) two forestry companies were contacted in either Phase I or II. The table below shows the results of these surveys.

	NUMBER	PERCENTAGE
Original Mail-Out	3	50%
Number Returned	2	66%
Telephone	1	100%
Number Successful Responses from Telephone Inquiry	1	100%
Personal Visits	3	50%
Total Response	6	100%

In Mechanics in Agriculture (9) nine tractor and farm equipment dealers were contacted in either Phase I or II. The table below shows the results of these surveys.

	NUMBER	PERCENTAGE
Original Mail-Out	3	33%
Number Returned	1	33%
Telephone Follow-Up	1	50%
Number Successful Responses from Telephone Follow-Up	1	100%
Personal Visits	6	66%
Total Response	8	88%

A supplementary report, not to be released publicly, gives the names of the agencies and their responses as part of the final project report.

CHAPTER I

Identification of Technical Occupations Agriculture and Related Businesses

The majority of the occupations given in the Agri/Business Areas were identified by members of the specialized Advisory Committee. Personal visits to selected businesses in each area completed the identification of occupational titles.

No attempt was made by the staff or committees to interpret what was meant by various job titles or occupations. The common titles currently in use by governmental agencies or businesses were used, as were the job titles listed in the Dictionary of Occupational Titles. The table below summarizes the number of occupations identified in each major area.

Area	Number of Occupations Identified
I. Landscaping Technology	15
II. Food Processing and Service	8
III. Forestry and Natural Resources	
A. Forestry	10
B. Game and Fresh Water Fish Management	4
C. Parks and Recreation	3
IV. Mechanics in Agriculture	7

BEST COPY AVAILABLE

CHAPTER II

TASK ANALYSIS OF SELECTED OCCUPATIONS IN AGRICULTURE AND RELATED BUSINESSES

In this chapter, a task analysis for each technical occupation is given. Section I presents the task analyses for occupations in Landscaping, Section II the analyses for occupations in Animal/Food Production, Section III the task analyses for occupations in (A) Forestry, (B) Game and Fresh Water Fish Management (C) Parks and Recreation, and Section IV presents the task analyses for Mechanics in Agriculture. Each section lists the occupation and its identifying code title. An (X) appearing in the column opposite the task row for a particular occupation indicates that that task is performed in the occupation.

These task lists were compiled from information and surveys conducted in Phases I and II. The original task lists were developed by task forces composed of members of the various advisory committees from job descriptions and publications available on competencies found in Agri/Business careers. From the original task lists, a written survey instrument was developed which could easily be completed by anyone familiar with the occupation. Selected businesses were identified who employed individuals in technical positions. They were contacted by a staff member, and at least one of the following methods was used to complete the survey instrument:

BEST COPY AVAILABLE

1. Completed by technicians supervisor.
2. Completed by personnel office staff.
3. Completed by project staff member from available job description information.

An attempt was made to obtain at least three completed surveys on each occupation. A consensus of individuals who completed the survey provided the basis for listing that task as being performed in that occupation.

1. Use the results of a soil test from a soil testing lab and make necessary fertilizer applications for profitable crop production.		X	X	X						
2. Read labels and analyze fertilizers on the market.				X						
3. Compute the cost of fertilizing crops using various materials purchased from local sources.				X						
4. Apply fertilizer to a crop using acceptable methods, recommended rates, and at the proper time.				X						
5. Plan ways of draining a swampy area.				X	X					
6. Operate farm level and surveying equipment.			X	X						
7. Irrigate and determine the frequency of irrigation for profitable crop production.		X								
8. Properly prepare and join a scion and rootstock for a cleft, bud, and whipgraft.		X		X						
9. Select plants for nursery stock.		X	X	X						
10. Conduct a germination test on a sample of seeds and analyze the results from both the producer and consumer viewpoint.		X								
11. Recognize the workings of insects, pests, and diseases, and perform the recommended control measures.	X	X	X	X		X	X			
12. Prepare, treat with rooting hormone, plant in a properly prepared rooting bed, and care for a variety of plant cuttings.		X	X	X						

FORESTRY AND NATURAL RESOURCES

JOB ENTRY TASKS	CODE 1	2	3	4	5	6	7	8	9	10
13. Identify common weeds of the community, recognize their methods of reproduction, and select possible control measures.			X	X						
14. Plan a cropping program for a specific crop commensurate with recommended community practices from seed bed preparation to harvesting.			X	X						
15. Reproduce plants using methods of sexual and vegetative reproduction.		X								
16. Estimate how many acres of forest land there are in a particular woodland and calculate the volume of wood.	X		X	X						
17. Prepare a simple and concise farm woodland management plan that will most profitably use the farm's resources-land, labor, and equipment.			X	X						
18. Given the proper tools and equipment, select, adjust, calibrate, service, and safely operate three or more farm implements.					X	X	X			X
19. Trouble shoot and service an internal combustion engine adjusting basic parts of the ignition, lubrication, fuel, cooling, and hydraulic systems of a farm tractor.					X	X	X			X
20. Perform basic metal working processes (arc welding, oxy-acetylene cutting, welding, soldering, etc.) in a safe and workmanlike manner.					X					X
21. Select, use, and maintain tractor hydraulic system.					X	X	X			X
22. Promote good human relations and communicate effectively with people	X	X	X	X	X	X	X	X	X	X

CHAPTER III

TASK - SKILLS/KNOWLEDGES ANALYSIS IN AGRI/BUSINESS

This chapter presents the skills and/or knowledges for each task listed in Chapter II. The identification of these skills and knowledges was made utilizing the following resources:

1. Consultants with expertise in the appropriate area.
2. Area specialists from the Duval County School Board.
3. Job description information from various governmental agencies and businesses.
4. Publications on agriculture careers.

A review of the skills and knowledges was made by members of the advisory committee before final approval. However, the skills and knowledges listed should not be considered as final. Each listing will be updated and revised as curriculum is developed in the second year of the project.

I. LANDSCAPING
A. NURSERY AND LANDSCAPE OPERATION

TASKS	SKILLS/KNOWLEDGES
1. Select and identify plant materials.	1.1 Identify plants by life cycle; annual, biennial, perennial. 1.2 Identify plants by their use; field crops, vegetables, fruits, nuts, ornamentals, forage, grain, and forestry. 1.3 Identify plants taxonomically.
2. Fertilize plant materials.	2.1 Identify the types of fertilizer. A. Commercial 1. Organic 2. Inorganic B. Natural 1. Organic 2. Inorganic 2.2 Explain the correct time for applications: A. Spring B. Fall C. Summer 2.3 Describe the methods for best application of fertilizer. A. Dry 1. Broad cast 2. Spreader B. Liquid 1. Sprayer 2. Irrigation system 2.4 Determine the correct amount of fertilizer to apply.

I. LANDSCAPING
A. NURSERY AND LANDSCAPE OPERATION

TASKS	SKILLS/KNOWLEDGES
3. Irrigate plant materials from hand waterers to automatic systems.	3.1 Analyze the correct time for watering. 3.2 Solve for the correct amount of water to apply. A. Once a week B. One inch per application 3.3 Identify the types of watering systems in general use: A. Portable 1. Hoses 2. Sprinklers B. Underground 1. Pipe systems 2. Sprinkler systems 3. Control valves 4. Types of systems
4. Prune plant materials.	4.1 Describe the purpose for pruning and trimming: A. Remove injured parts B. Stimulate old plants C. Improve shape D. Disease control 4.2 Choose the correct time for pruning. A. Early bloom B. Late bloom 4.3 Demonstrate the correct methods of pruning. A. Thinning B. Increasing foliage C. Hidden cut

I. LANDSCAPING

A. NURSERY AND LANDSCAPE OPERATION

TASKS	SKILLS/KNOWLEDGES
5. Cultivate plant media.	5.1 Identify weeds and remove weeds from plant beds. 5.2 Determine soil characteristics for plants being grown. 5.3 Fertilize plants according to type of soil they need. 5.4 Support plants as needed with stakes, string, etc.
6. Ball and wrap plants.	6.1 Describe methods and carry out correct procedures in balling and wrapping plants. 6.2 Explain factors to be considered when balling and wrapping plants such as: A. Temporary storage B. Shock to plant life C. Reviving weakened plants
7. Grade plants according to size and quality.	7.1 Grade plants according to size and discard defective or substandard plants. 7.2 Wrap shrubs and trees using ball and burlap technique. 7.3 Remove plants from beds and transplant into pots or fields.
8. Package and load plant materials.	8.1 Pack plants for shipment. 8.2 Treat plants for shipment to avoid shock to plant life.

I. LANDSCAPING
A. NURSERY AND LANDSCAPE OPERATION

TASKS	SKILLS/KNOWLEDGES
9. Direct labor.	9.1 Compare the methods of building positive attitudes, exercising leadership, and developing good relations with others. 9.2 Describe the purposes of the major laws concerning business and labor. 9.3 Recognize the importance of receiving directions and carrying out instructions intelligently. 9.4 Recognize the importance of giving directions and instructions intelligently.
10. Operate nursery equipment.	10.1 Identify and be able to use all common nursery equipment. 10.2 Formulate and execute schedules for: A. Watering plants B. Fertilizing plants C. Determine lighting and shading schedules D. Vary temperature and humidity
11. Perform routine maintenance, repair and adjustments to nursery equipment.	11.1 Perform schedules maintenance on electric motors, gasoline engines, pumps, injector equipment, etc. 11.2 Keep plumbing in operating condition.

BEST COPY AVAILABLE

I. LANDSCAPING

A. NURSERY AND LANDSCAPE OPERATION

TASKS	SKILLS/KNOWLEDGES
12. Mix growing media.	12.1 Diagnose soil for mineral and vitamin deficiency. 12.2 Mix soil with sand, peat, minerals, and fertilizer to meet plant requirements.
13. Place plants in containers.	13.1 Place soil mixture in pots or containers to proper depth. 13.2 Place plants so that growth is assured. 13.3 Water and fertilize as needed.
14. Calibrate sprayer.	14.1 Measure materials to be sprayed accurately. 14.2 Run test to determine accurate proportions. 14.3 Set sprayer mechanism to deliver required amount of mix.
15. Construct and repair growing structures: plumbing, electrical, carpentry, concrete.	15.1 Identify common building materials, including lumber, nails, hardware items, concrete. 15.2 Figure a bill of materials and compute its cost for a simple farm outbuilding (e.g. potting shed). 15.3 Properly select and use both hand and power wood-working tools to erect a small nursery or greenhouse shelter.

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	15.4 Lay out and build forms for pouring concrete foundations, floors, etc.
	15.5 Select a paint or preservative, prepare the surface and paint a home/farm building.
	15.6 Perform simple plumbing (e.g., pipes for watering seedlings).
	15.7 Perform simple electrical wiring (e.g. convenience outlet).
	15.8 Select materials and build various benches - work, plant, etc.
16. Adjust heating and ventilation systems.	16.1 Determine heat loss factor for various materials used in greenhouse and nursery construction such as plastic, glass, etc.
	16.2 Know heating requirements (BTU's) of the various plants being grown.
	16.3 Follow operator's manual for operating: A. Heating systems B. Ventilation systems

BEST COPY AVAILABLE

I. LANDSCAPING

B. LAWN AND LANDSCAPE PEST CONTROL

TASKS	SKILLS/KNOWLEDGES
17. Prepare truck: review orders, select chemicals, check equipment, load chemicals and equipment, determine and mix appropriate sprays to be used on the job.	17.1 Select chemicals according to plants or insects to be sprayed. 17.2 Observe safety rules and regulations at all times. Sprays are often quite poisonous. 17.3 Follow manufacturer's recommendations for operation of spraying equipment. 17.4 Flush or inspect spray tanks before filling with any chemicals.
18. Operate spray truck.	18.1 Observe all safety regulations when dealing with spray and spray truck. 18.2 Follow prescribed spraying techniques.
19. Operate and maintain spray equipment and pumps (routine maintenance).	19.1 Clean and flush all spray equipment and pumps after each use. 19.2 Prepare and store equipment when not in use. 19.3 Maintain all pressure lines and gauges in excellent condition. Repair all leaks promptly. 19.4 Keep all moving parts lubricated as per manufacturer's manual.

BEST COPY AVAILABLE

I. LANDSCAPING
B. LAWN AND LANDSCAPE PEST CONTROL

TASKS	SKILLS/KNOWLEDGES
20. Spray plants according to: A. Plant characteristics B. Pest characteristics C. Spray material conditions	20.1 Select spray equipment according to type that is best suited for the job. 20.2 Select and mix spray materials as needed. 20.3 Exercise appropriate safety precautions for spraying. 20.4 Spray plants in approved manner.
21. Spray and kill brush.	21.1 Select appropriate spray equipment. 21.2 Take appropriate safety steps to avoid killing desirable plant life. 21.3 Choose chemicals to kill desired brush. Use extreme care and practice correct safety handling procedures.
22. Diagnose common pest problems and relay information to superior, if there is one.	22.1 Recognize all common pests in the community by sight. 22.2 Describe the physical conditions of plant, tree, or turf area suffering from each of the common pest problems.
23. Determine drift hazards; need to recognize weather's influence and conditions.	23.1 State the best time of the day for spraying and treating with chemicals.

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	23.2 Recognize the economic factors of spraying with reference to weather conditions.
	23.3 Recognize liability of damage suits - due to drift hazard into private property.
24. Keep records: time, materials, conditions.	24.1 Keep accurate records of: A. Time (labor) B. Materials C. Growing conditions D. Financial transactions
25. Estimate cost of jobs.	25.1 Draw and/or design a plot plan to scale.
	25.2 Locate desired drives, walks, shade trees, enclosures, and other garden features on the plan.
	25.3 Estimate cost of materials for the job.
	25.4 Estimate cost of labor for the job.
26. Meet the public.	26.1 Communicate with the public using proper grammar, composition and vocabulary, oral and written.
	26.2 Present pleasing and clean personal appearance to the public.

BEST COPY AVAILABLE

I. LANDSCAPING
B. GOLF COURSE MAINTENANCE

TASKS	SKILLS/KNOWLEDGES
27. Operate gang mowers or tractor drawn mowers in mowing areas.	27.1 Identify various types and makes of lawn mowers by mower type and engine type. 27.2 Demonstrate care and maintenance of turf area with regards to: A. Frequency of mowing B. Height of mowing C. Method of mowing 27.3 Explain "scalping" as done by mowers and how to avoid future damage.
28. Operate sweepers and rollers in maintaining grounds.	28.1 Interpret operator's manual so that equipment is operated safely and correctly. 28.2 Explain why sweeping is necessary for maintaining grounds. 28.3 Explain why rollers are necessary for maintaining grounds. 28.4 State conditions and times for sweeping and rolling.
29. Perform routine maintenance, cleaning, lubricating, adjusting, on sweepers, rollers, and mowers.	29.1 Demonstrate height of cut adjustment procedures for available makes of mowers. 29.2 Perform routine sharpening and balancing of rotary blades. 29.3 Perform basic lubrication maintenance on various types of mowers.

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	29.4 Describe safety practices which should be observed when working with sweepers, rollers, and mowers.
30. Water and fertilize greens, fairways, and large turf areas.	30.1 Describe the best conditions and time for watering greens, fairways, etc. 30.2 Describe the best conditions and time for fertilizing greens, fairways, etc. 30.3 State the conditions which govern the amount of water/fertilizer which is applied and how often.
31. Grade and prepare base, lay sod and seeding.	31.1 Establish a turf area, paying attention to such details as: A. Grading of site B. Soil preparation C. Drainage D. Irrigation and watering E. Management and care until established 31.2 Establish a turf/turfs by one or more of the following methods: A. Sodding B. Seeding C. Sprigging 31.3 Roll turf areas as needed.

TASKS	SKILLS/KNOWLEDGES
1. Identify in the field the important breeds of livestock in the community.	1.1 Identify the various breeds of livestock in the community. A. Cattle (e.g. beef, milk) B. Horses (e.g. riding, quarter) C. Fowl (e.g. laying, broilers) D. Swine
2. Identify the various body parts of animals.	2.1 Name the various body parts and life systems of the following animals: A. Cattle B. Horses C. Fowl D. Swine
3. Select livestock, dairy, and poultry in accordance with breeding and marketing standards.	3.1 Evaluate the choice of livestock or poultry according to the following factors: A. Availability of feed B. Demand C. Capital available
4. Keep accurate production records.	4.1 Analyze production records for the following systems of operation: A. Pure bred B. Commercial

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	4.2 Establish and compare performance and production records to include: A. Rate of gain B. Economy of gain C. Litter size D. Breeding and herd records E. Percent calf crop F. Birth weight G. Progeny records
5. Determine the nutrient requirements of various types of livestock, dairy, and poultry found in the community.	5.1 State the common terminology for nutrient needs of animals. 5.2 Explain the importance of correct feeding. 5.3 Describe various animal nutrition in terms of: A. Food nutrients required B. Average daily ration
6. Determine the nutritional value of feeds.	6.1 State common terminology for nutrient values of feeds. 6.2 State common sources of feed nutrients. 6.3 Describe the function and purposes of feed nutrients. 6.4 State the classification and composition of feeds according to the following: A. Roughage, kinds of B. Concentrates

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	6.5 Analyze the values of different feeds. 6.6 Explain the basic economics of feeding. 6.7 Describe the need or lack of need for feed additives.
7. Design a balanced ration for a simple-stomached farm animal using local feeds and prices.	7.1 Demonstrate how to formulate and balance a ration: A. Kinds of rations B. Computing rations 7.2 Describe use of forage. 7.3 Describe the use of pasture.
8. Design a balanced ration for a plural-stomached farm animal using local feeds and prices.	8.1 Demonstrate how to formulate and balance a ration: A. Kinds of rations B. Computing rations 8.2 Describe the use of forage. 8.3 Describe the use of pasture.
9. Recognize signs for determining gestation and heat periods for farm animals.	9.1 State common terms and definition for reproduction. 9.2 Describe the reproductive systems for A. Male 1. Bull 2. Stallion 3. Boar

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	B. Female 1. Cow 2. Mare 3. Sow
10. Perform artificial insemination.	10.1 Explain the physiology of livestock breeding including basic genetic principles. 10.2 Explain reproductive processes. 10.3 Explain reproductive cycles. 10.4 Describe why crossbreed animals receive hybrid vigor.
11. Plan a livestock improvement program for a type of livestock in the community, specify breed, schedules for breeding, sire-dam ratio, culling program indicating standards.	11.1 Describe the methods of breeding. A. Natural breeding B. Artificial breeding 11.2 Explain the different systems of breeding. 11.3 Describe the type of breeding production. 11.4 Explain a livestock basic genetics program. 11.5 Describe selection processes based on: A. Personal appearance B. Heredity and production records 11.6 Describe culling processes based on: A. Undesirable quality B. Age C. Heredity

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
12. Analyze progeny records for such things as: A. Pounds of gain per pound of feed B. Carcass yield and quality C. Cost per pound of gain	12.1 Establish and maintain proper managerial records to include: A. Rate of gain B. Economy of gain C. Inherited traits
13. Design a program to promote good health and safety of farm animals.	13.1 Describe how to use antibiotics as feed additive. 13.2 Distinguish good animal health by recognizing the proper signs according to: A. Contentment B. Alertness C. Good appetite D. Bloom and good hair coat E. Bright eyes F. Normal feces and urine G. Other signs 13.3 Describe how to provide for proper animal sanitation: A. In housing B. In ventilation C. Manure disposal D. Disinfectants 13.4 Recognize the most common and serious animal diseases indegenous to the area, and describe their economic importance.

TASKS	SKILLS/KNOWLEDGES
17. Keep accurate production and financial records on a particular livestock enterprise.	17.1 Establish and maintain proper managerial records to include the following financial records: A. Expense and income B. Inventories C. Projected budgets D. Debts and mortgages E. Income tax records F. Insurance records G. Others
18. Analyze the records to determine if his management practices were profitable.	18.1 Analyze performance and pro records to determine if management practices were profitable.
19. Interpret market reports in newspaper and official reporting services.	19.1 Describe the following types of markets: A. Livestock auction markets B. Terminal markets C. Private treaty sales D. Agency buying E. Direct slaughter house market 19.2 Interpret marketing cycles for livestock with regards to: A. Breeding for profitable marketing B. Seasonal markets 19.3 Recognize the market classes and grades of livestock (beef) according to the following criteria: A. Market classes of beef cattle B. Market sex classes of beef C. Market age classes of beef D. Market grades of beef cattle

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	19.4 Recognize market classes and grades of swine according to the following criteria: A. Market classes of hogs B. Market sex classes of hogs C. Market grades of swine
	19.5 Recognize market classes of horses: A. Market classes B. Sex classes
20. Recognize and treat mastitis.	20.1 Know when to call veterinarian and give injection for mastitis when necessary.
21. Operate automatic feed equipment.	21.1 Describe or demonstrate how to operate various feeding equipment.
	21.2 Select the necessary equipment for feeding based on: A. Type of operation B. Size of operation C. Cost involved
22. Operate refrigeration equipment.	22.1 Explain the environmental factors which affect feed storage and feed handling.
	22.2 Describe the basic types of refrigeration equipment used in dairy operation.
23. Repair minor broken machinery and equipment.	23.1 Read and recall from the operator's manual how to adjust or repair broken or inoperative equipment.

BEST COPY AVAILABLE

TASKS	SKILLS/KNOWLEDGES
	23.2 Identify nomenclature pertaining to servicing and operating farm machinery and equipment.
	23.3 Describe safety precautions in care and maintenance of tractors and equipment.
	23.4 State the economics involved in the reconditioning of farm machinery and equipment.
	23.5 Describe and/or demonstrate how to adjust farm machinery under operating field conditions.
	23.6 Explain the importance of lubrication to the life of equipment.
24. Use, maintain hand tools and non-powered equipment.	24.1 Identify hand tools and non-powered equipment used in farming.
	24.2 Demonstrate how to maintain hand tools.
	24.3 Demonstrate how to use hand tools and non-powered equipment in a safe manner.
25. Milk dairy cows.	25.1 Explain sanitation and procedures prior to milking.
	25.2 Describe or demonstrate how to set up and attach a milking machine.

	10.3 Service the lubrication system: A. Add and change lubricant, change filters. B. Remove and replace oil pump. C. Pressure test lubrication system. D. Remove and replace oil pressure indicators.
11. Perform equipment maintenance, routine and repair.	11.1 Make visual examination of parts for wear recognizing abnormal wear signs, leakage around parts, etc. 11.2 Use measuring tools and equipment to check wear against manufacturer's specified limits.
12. Conduct routine in-service inspections and keep records of data obtained.	12.1 Utilize operation manual for establishing frequency and degree of inspection to perform. 12.2 Establish file to keep records of each inspection noting work performed.
13. Use test equipment to determine mechanical, electrical, or hydraulic problems and recommend preventive measures.	13.1 Understand and be able to use test and measuring equipment such as: A. Feeler and spark plug gauges B. Micrometers and calipers C. Compression gauges and vacuum gauges D. Dial indicators E. Timing lights F. Dwell meters G. Hydrometers (battery and coolant) H. Battery cell testers I. Headlight aiming machines
14. Follow prescribed procedures regarding stock control, warranties, etc.	14.1 Replace or order spare parts for equipment subject to excessive wear.

CHAPTER IV

NUMBER OF PRESENT AND ANTICIPATED EMPLOYEES IN AGRI/BUSINESS

This chapter presents a breakdown of the number of present and anticipated employees for the selected occupations identified in Chapter II. The data from which these tables were developed was a continuing process of the staff throughout Phases I and II.

The majority of data was compiled through the use of a written survey. The survey was mailed to (164) one hundred sixty-four Agri/Businesses in Northeast Florida. The responses to that survey and the follow-up are given in the introductory section. A confidential supplementary report, not to be released publicly, gives the names of the businesses and their responses. This report will be part of the final project report.

CHAPTER V

CONCLUSIONS AND RECOMMENDATIONS

This chapter presents the conclusions and recommendations of the Project Staff as they relate to the Agriculture Area of technical education.

This chapter did not appear in the original summary report due to the fact that sufficient time was not available to review the findings with each of the Special Area Advisory Committee members. The staff also felt that feedback and recommendations from the Joint Planning Committee and the General Advisory Committee would be beneficial information to have before any summaries were written.

Therefore, the comments included in this section represent the opinions of individuals with expertise in the Agriculture Area who have reviewed all available data. Such opinions should not be considered final or mutually exclusive of other judgments in that they are only presented here as a summary of the Project Staff's findings.

CHAPTER V

CONCLUSIONS AND RECOMMENDATIONS

Although Florida's northeastern region is not a heavily agricultural one, there are still a number of presently available jobs in agriculture, and the outlook for future jobs is strong enough to support development of pre-technical curriculum materials. For example, within the landscaping area alone, new jobs totalling nearly 25% of the current work force become available over the next twelve months.

In addition, increased interest in outdoor recreation, ecology, conservation, and our natural resources, in general, is likely to stimulate demand for technical workers with skills in areas related to "Agri/Business". The tremendous increase in the number of "recreational vehicles" and the consequent need for naturalistic camping facilities should, in itself, increase the job market. Too, increasing interests in "natural foods", organic farming methods, and related topics may very well bolster the market for agricultural workers in all parts of the country. With respect to "tastes in occupations", moreover, it is likely that more and more young people will exhibit interests in work which takes them out-of-doors and "back to nature".

BEST COPY AVAILABLE

Finally, as the general standard of living rises, there is a natural tendency to increase the proportion of discretionary income allocated to "aesthetic and recreational" expenditures. In a climate such as northeastern Florida, this would doubtless lead to more dollars being spent on both residential and commercial landscaping, as well as on pursuits, e.g. golfing, which requires rigorous maintenance of landscaped and specially prepared grounds.

In terms of curriculum design, this occupational area should prove quite cost effective in that modules will result which have potential utility in other areas, e.g. motor repair and maintenance. There is also the possibility of some transfer of training effects in communications, record keeping, and human relation skills. In all, placing a high priority on further design and development of concepts and educational materials appears supported by this needs assessment.
